Battle River U.F.A. & U.F.W.A. Con- vention at Wain- wright July 16-17

The Battle River U.F.A. and U.F.W.A. Federal Constituency Association will hold their annual convention at Wainwright, on Monday and Tuesday, July 16-17th.

All locals are urged to send a delegate, dues may be handed in at the convention.

There are to be a number of good speakers, including Mrs. R. B. Gunn, and H. E. Spencer, M.P. will give a full report on the past session at Ottawa.

BIG CROWD AT IRMA THURSDAY

Commencing with the arrival of the Confederation train at 6.45 Thursday morning Alexandra County Lodge of the Orange Society, commenced one of the biggest celebrations ever held in this part of Alberta. Two five and drum bands accompanied by some fifty members of the order arrived on the Confederation from Edmonton, Chauvin, and other points east of Wainwright. Shortly after automobiles commenced rolling in from all parts till by noon Irma streets were crowded with strangers. About 11.30 the grand parade was formed on First Avenue and proceeded up Main St., to the Fair grounds where a big programme of sports had been arranged for. Bull teams were here from Rockyford, Viking and Fabyan. A full list of events and results of the games will be given next week.

SALVATION ARMY COMING TO IRMA

Touring the rural districts of Alberta, and due through these parts in a few days, the Charioteers of the Salvation Army in their Motor Chariot will hold special musical and religious gatherings. Captain Barney who is in charge of the party is not new to this work as he has travelled through Manitoba in connection with similar work there.

The whole party are versatile, being able to play a number of musical instruments, are good singers, and speakers. A real treat is therefore in store for those able to hear them. The idea of this work which is developing all over rural Canada is to supplement the work of the churches and to reach people who otherwise would not have the opportunity of hearing the Army and seeing its work.

Towns they will visit:

Phillips—July 15th.
Kinsella—July 15th.
Irma—July 16th.
Fabyan—July 17th.

ROSEBERRY NEWS

The picnic held on Monday, July 2nd at the Roseberry Picnic grounds was enjoyed by all, both young and old.

The dance held in the school house at night was a decided success. James Hamilton of Vermilion (late of Irma), acted as floor manager in his usual jolly and capable manner.

The concert given by the Irma choir on July 6th at Roseberry was very much enjoyed by all present. No artist could be given any special credit as every item on the programme was encored and responded to.

Owing to the rain the crowd was not as large as might have been. We hope the choir will come back in the near future and entertain us again.

Mr. Geo. Taylor has returned to his home in Roseberry for his vacation after having taught at Kinscote for the past school year.

Crop conditions have rarely looked better, early wheat is heading out nicely and all grain has a dark green color. Cutting sweet clover is progressing nicely and several farmers who started sowing this crop last year will have a nice lot of feed for next winter.

MANNVILLE HAS MURDER MYSTERY

With the mystery of their murder still unsolved, Mrs. Eunice Booher, her 24 year old son, Fred, and two hired men, Gabriel Grumley and another known only as "Bill", were buried at the cemetery one mile from Mannville, Thursday morning, with only Henry Booher, husband of the murdered woman, and a few curious as witnesses.

Vernon Booher, younger son of Mr. and Mrs. Booher, is still held as a material witness and with the firehall considered an unsafe jail, he was brought to Edmonton late on Wednesday night and is now lodged in the police cells in this city. Officials at headquarters state that he is still being held as a material witness, but it is known that the youth's own story of the murder is being closely investigated.

No trace has yet been found of the .303 British Army rifle with which the police are convinced that the shooting was done. The rifle was stolen from the home of C. Stevenson, whose farm is about one mile away from the Booher residence, but just when the theft took place the investigators are unable to determine.

Shell Only Clue
The lone shell, found on the floor of the dining room in the Booher home, was the only clue left behind by the slayer, and had evidently been overlooked, as all the other discharged shells are missing. In all five shots were fired.

Meanwhile the detectives engaged on the case are tracing every person who was a recent visitor to the Stevenson farm, and are checking up on their movements. Belief is growing that the slayer, after the shooting made his way to the Vermilion river, a few hundred yards from the Booher home, and threw the rifle and empty shells into the fast flowing river.

While police are reticent to discuss the case it is known that they believe they are close to a solution of the mystery.

The murder victims were buried on orders of Coroner Dr. Heaslip. No funeral services had been arranged but a memorial service will be held at the Mannville church next Sunday.

T. T. FUNSTON PASSES

Friday, July 6th, Mr. Thomas Theodore Funston, passed away at one of the Edmonton hospitals where he had been taken a few days previous. The late Mr. Funston had been feeling poorly for some time and had gone to Edmonton for special treatment and suffered with a weakness of the heart at the hotel in which he had been stopping a few days before his death. The deceased was in his 68th year and had been a resident of the Irma district for ten years, coming here from Killam. During his residence here he was highly respected by all who knew him. He was a charter member of the Grattan Masonic Lodge who had charge of the funeral which was held from Irma United Church, Monday afternoon. The church was packed with members and neighbors who met to pay their last respects to a neighbor and brother who will be missed from the district. The only relatives left by the deceased was one brother, in Kansas and a sister in Illinois. Mr. and Mrs. A. McEneaney, neighbors of the deceased, was notified by him Wednesday previous to his death and left immediately for the City where they remained and returned with the body Saturday.

Wedding Bells

STAUFFER—DEFOE

Wednesday afternoon July 11th Miss J. G. Stauffer, daughter of Mr. and Mrs. F. J. Stauffer of Jarrow, was united in marriage at the home of the bride by Rev. A. O. McNeil, to Mr. C. W. Defoe, son of Mr. and Mrs. H. Defoe of Veteran, Alberta. The bride was dressed in light beige celanese crepe. Miss Defoe, sister of the groom acted as bridesmaid, and Mr. Harry Stauffer supported the groom. About thirty guests were present and enjoyed a buffet lunch after which the happy couple left for Banff and other points. Upon their return the happy couple will reside on the groom's farm near Veteran, Alta.

REVIEW OF ALBERTA MARKETS

BEEF—Little change noticed on Edmonton market this week. Choice heavy steers \$9@89.50; choice light \$9@89.50; good \$8@89.50; medium \$8@88.25; common \$7@88.

FEEDERS, STOCKERS—Trading in this market continues fairly active. Feeder steers from \$7@88; stock steers \$6@87.50; stock heifers \$5@86.50; stock cows \$4.50@5.50.

Edmonton reports their quotation is \$10.50 for thick smooths on feed-lard watered basis, with selects going over the scales at \$11.

Reports that Russia was in the market for substantial supplies and more rain in the U.S. wheat belt were factors which caused a strong tone to the market at Winnipeg yesterday.

CREAM—Deliveries good during past week. Prices unchanged, with special 43c, first 32c, second 29c at centralizers, and 2c less at country points.

DAIRY BUTTER—Little doing in this market as bulk of cream is being shipped.

POULTRY—Receipts of fowl light and not in very good condition. Broiler offerings are increasing, but quality from Alberta shippers is below standard. B. C. stocks selling readily; trade active.

EGGS—Prices unchanged at 26c@32c for extras; demand good, but supplies light. Bulk of eggs in good shape, although of late they have been grading slightly lower.

HAY—Timothy getting scarce and a little difficulty is found in obtaining stock for orders. Some of trade at country points paying as high as \$15@16 per ton. Upland still at \$9.50@10. Trade slightly easier this week, but still a good volume moving.

FEEDS—OATS—Quotation of 55c@58c prevails; good demand, but receipts are limited.

HIDES—Market still weak; quality showing improvement and stronger tone expected during next two or three weeks. **WOOL**—Advance of 1c registered making the price 27c for stocks delivered to Calgary.

Activity over for season, so there is very little doing. Few sales between now and opening, but they will not amount to much.

NEWS ITEMS FROM KINSELLA

Mr. Fred Anderson who has been visiting his brother, left for his home in Winnipeg last Wednesday.

Mr. and Mrs. Horner are visiting in Edmonton.

Mr. Haight who has been spending some time with his granddaughter, Mrs. Rees returned to Edmonton Monday evening.

Mr. and Mrs. Austin and daughter Phyllis and Miss Bessie Hart left on a motor trip to the States on Tuesday.

The Ladies Aid Tea and Sale of Aprons was held on Saturday, although the weather and roads were not very favorable about \$30.00 was taken in.

Mr. and Mrs. E. C. Williams and family, Mr. and Mrs. Ross Eaton were in Minburn Sunday afternoon.

Miss Chisholm and nephew Master Lloyd Pocock who have been spending sometime at the R. Cormack home, returned to their home in Saskatoon last week.

The Misses Margaret and Francis Hacker of Vegreville are visiting their aunt, Mrs. D. Corbett.

Miss Minnie Ross and Master Harold Ross of Viking spent the week end with their aunt Mrs. P. J. Wangness.

VALLEY SPRING PICNIC
The Valley Spring U.F.W.A. and U.F.A. will hold a joint picnic at Pendleton's Lake on Wednesday, Aug. 8th.

Speakers, Foot Races, Horse Races, baseball, etc. Watch for posters.

The members of the Irma Orange Lodge, attended Irma United Church Sunday evening when Rev. Mr. Wright preached a most appropriate sermon. The seating capacity of the church was taxed to the limit.

CHURCH NOTICES AND ACTIVITIES

Next Sunday the services will be at Strawberry Plains at 11 A.M.
Alma Mater—3 P.M.
Irma — 8 P.M.

The program of the choir concert given by the Irma Choir last Friday evening in aid of the Maintenance and Extension fund was as follows:

Programme:

CANADA. 1. Anthem by the Choir; 2. Duet on the Piano by Mrs. Wright and Mr. Wright; 3. Solo by Mr. Gordon Fenton; 4. Reading by Mr. Nash; 5. Duet by Mr. and Mrs. Locke; 6. Solo by Mrs. Wright; 7. Duet on the Piano by Morris Wright and Mrs. Wright; 8. Solo by Mr. Pryce Jones; 9. Reading by Miss Thurston; 10. Anthem; 11. Duet by Mrs. Wright and Mr. Gordon Fenton; 12. Solo by Mrs. Locke; 13. Anthem by the Choir, Auld Land Syne.

The audience so heartily enjoyed the program that encores were the order of the evening. A social time was enjoyed after the concert. Mr. Seton and Mr. Murray kindly assisted with their cars.

CHURCH NEWS

Sunday School at 11 A.M.

This is a church school. Everybody in the Sunday School is the idea. You cannot expect your boys and girls to "want" to attend Sunday School if you do not attend yourself. "Example is better than precept." Why not have an auto attendance contest; Mother and Dad, and bring your whole family and your neighbor too! What ought to be done, can be done. You can, but will you? We have the best of "good times" studying the Bible to gether—the Book that stands for love and loyalty to our country, to our God, and to our own community—the Book that has the largest sale of any of the books in the world.

In the Primary class memory contest, the boys are ahead. In the Junior class, the girls. Get busy Captains and get your team to work during the holidays.

Next Sunday, July 15th the world's Sunday School day, our Sunday School library opens. Your name and the date you receive and return the book is all we ask for the books you take. You may keep a book two weeks. Yes, we ask more, and that is, that you bring the book back in good condition. Place it out of reach of baby fingers when not being read.

Yes, the Sunday School holiday mail box, is actually hanging in front of the church to receive holiday post cards from absent members.

Last Sunday seventy-three attended Sunday School as against thirty-seven a year ago, and seventeen the year before that. Reader, we miss you. Come next Sunday.

Two of our Normal students, the Misses Sanders and Congdon are teaching the "Beginners" and the Junior class during the holidays. Mrs. Shaw will take Mrs. Campbell girls while Mrs. G. is away on a holiday trip.

Drive your own Car!

WHY walk, or be dependent on public transportation facilities, when you can drive your own car . . . go where you like, when you like, as you like.

There is no barrier of price standing between you and the ownership of a good used car.

We have a finer selection of used cars than ever . . . and the prices are the lowest we have ever been able to quote. These cars have been taken in exchange on new Chevrolets . . . checked over carefully and priced to interest shrewd buyers.

Come in and learn how easy it is to own and drive your own car. Easy payment plan available.

Another Step Toward Permanent Peace

Throughout the years of the Great War, the people of the allied nations were repeatedly told that it was a war to make the world safe for democracy, "a war to end war." And when at last the great struggle ended and the League of Nations came into being it was thought that, with the bitter experience of the war fresh in all minds, there would be little hesitation on the part of any country to join the League, and that, with 100 per cent. world membership in the League, world disarmament would follow in due course.

The refusal of the United States to have anything to do with the League of Nations, the very country in which the idea originated, came as a rude shock to all lovers and advocates of peace. It discouraged Europe, re-awakened all the old fears, and actually led to renewed activity in the piling up of armaments. Nevertheless, the League struggled on, gaining new adherents, and, with each succeeding success in settling international disputes and preventing open ruptures, the League grew in strength and prestige. Nonetheless, so long as the United States remained aloof it was felt that the structure for world peace was imperfect and insecure.

Because of this fact, the recent action of Mr. Kellogg, United States Secretary of State, in inviting the nations of the world to enter into a multilateral treaty to outlaw war, was enthusiastically welcomed by all lovers of peace, and nowhere quite so heartily as in Canada and other parts of the British Empire.

Already fifteen nations, including, with the exception of Russia, all the Great Powers, have signified their willingness to sign such a treaty. The draft of this momentous international document is brief and to the point, and, as it may well prove to be the Magna Charta of world peace, it is worthy of the widest possible reproduction in order that all people, everywhere, may read it. The preamble, in part, is as follows:

"Deeply sensible of their solemn duty to promote the welfare of mankind,

"Persuaded that the time has come when a frank renunciation of war as an instrument of national policy should be made to the end that the peaceful and friendly relations now existing between their peoples may be perpetuated,

"Convinced that all changes in their relations with one another should be sought only by pacific means and be the result of a peaceful and orderly process, and that any signatory power which shall hereafter seek to promote its national interests by resort to war should be denied the benefits furnished by this treaty;

"Hopeful that, encouraged by their example, all the other nations of the world will join in this humane endeavor, and by adhering to the present treaty as soon as it comes into force, bring peoples within the scope of its beneficent provisions, thus uniting the civilized nations of the world in a common renunciation of war as an instrument of their national policy."

Then follows the names of the fifteen nations who have signified their willingness to sign such a treaty, namely: Australia, Belgium, Canada, Czechoslovakia, France, Germany, Great Britain, India, Irish Free State, Italy, Japan, New Zealand, Poland, South Africa, United States of America.

To what do they agree? Having approved the declarations in the preamble quoted above, they bind themselves as follows:

"Article I. The high contracting parties solemnly declare in the names of their respective peoples that they condemn recourse to war for the solution of international controversies, and renounce it as an instrument of national policy in their relations with one another.

"Article II. The high contracting parties agree that the settlement or solution of all disputes or conflicts of whatever nature or of whatever origin they may be, which may arise among them, shall never be sought except by pacific means.

"Article III. The present treaty shall be ratified by the high contracting parties named in the preamble in accordance with their respective constitutional requirements and shall take effect as between them as soon as all their several instruments of ratification shall have been deposited at . . .

"This treaty shall, when it has come into effect as prescribed in the preceding paragraph, remain open as long as may be necessary for adherence by all the other powers of the world. Every instrument evidencing the adherence of a power shall be deposited at . . ., and the treaty shall immediately upon such deposit become effective as between the power thus adhering and the other powers parties hereto."

"That is the whole document, beautiful in its simplicity, momentous in its sweeping renunciation of war under any and all circumstances. It does not replace the League of Nations, but adds power and strength to it. No loopholes are left, and should any nation signing this treaty ever again resort to war it would become, as never before, an outlaw among the nations.

Substitutes Cards For Pistol

Affair Of Honor In Czechoslovakia Settled In New Way

Pistols have given way to cards in the settlement of "affairs of honor" in Czechoslovakia, judging by the method adopted by a business man at Bruenn, near Prague, to avenge an insult.

An engineer in the town is said to have given offence to this business man, who challenged him to a duel.

Vacationists!

You'll find many uses for Minard's during your vacation days. Pack a bottle in your grip.

W. N. U. 1740

"Why not settle the affair at cards?" another man suggested. The men agreed, and sat down at the card-table to play for a stake of £1,500. The business man won.

Another Great Possibility

Passengers May Soon Be Transferred From Moving Train To Dirigible

Transfer of passengers to and from moving trains by dirigibles was described at Belleville, Ill., as a "practicable possibility of the near future," by Col. John A. Paegelow, veteran commandant of Scott army field.

Paegelow based his opinion on the successful "dirigible-to-train" transfer of mail, in which a 210-foot non-rigid blimp synchronized its flying speed of 30 miles per hour with that of a moving Illinois Central train.

The dirigible came to rest on top of a coach for a period of few seconds—long enough to effect the transfer of a pouch of mail without difficulty.

The army blimp which made the test carried a crew of six men.

A Wonderful Performance

Recent Flight Over Pacific Was Great Achievement For Flyers

The great flight over the Pacific Ocean by the Australian, Captain Kingsford-Smith, leader, and his companions, puts British prestige at the peak in this form of endeavor. The "Southern Cross" winged its way to fame under control of four men, each performing an essential task in making the trip scientifically safe and sane. This feature alone raises the Pacific flight out of the category of regular daredevil stunts and enhances notably the merit of the performance. Regular radio reports received from the Southern Cross during its flight robbed the journey of some sensational features beloved of the crowd, but detracted not a bit from the glory won by the fliers. Their accomplishment is the more valuable because they made use of every possible device to combat the fury of the elements with man's most powerful weapons.

HOW DELICATE GIRLS ARE MADE STRONG

Rich, Red Blood Needed To Keep Up Their Vitality

It should be borne in mind that pale, bloodless girls need plenty of nourishment, plenty of sleep, and regular out-of-doors exercise. But a lack of appetite and tired, aching limbs tend to hinder progress. To save the weak, thin-blooded sufferer, she must have new, rich blood, and nothing meets a case of this kind so well as Dr. Williams' Pink Pills. These pills not only enrich and increase the blood supply, they help the appetite and aid digestion, relieve the weary back and limbs, thus bringing new health and strength and transforming anemic girls and women into cheerful, happy people. The value of Dr. Williams' Pink Pills in the case of anemic girls is proved by the case of Miss Lucy Stoddard, Margaretville, N.S., who says: "From the age of 12 to 15, I was in an anemic condition. I was very thin and nervous, had no appetite and had no desire to take part in the doing of those of my age. My mother got tonic after tonic for me, but they did me very little good. Then Dr. Williams' Pink Pills were recommended and almost from the first they seemed to be just what was needed to restore my strength. After taking the pills for a time I felt an altogether different girl. I got up in the morning feeling bright and active, and ready for work or play. Since then I have always taken a couple of boxes of Dr. Williams' Pink Pills in the spring as a tonic, and I thus kept in the best of condition. Every weak girl should promptly follow the example of Miss Stoddard, feeling sure that the pills will renew her health. You can get the pills from the nearest druggist or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Show Canadian Films

Views Of Canada To Be Shown In Britain and Central Europe

"Seeing Canada" films, made by Canadian Government, will be shown in from 200 to 500 British theatres this year as well as in Germany and Central Europe, says Captain Frank Badgley, M.C., director of the Canadian Government Motion Picture Bureau, upon his return from Great Britain. He expressed a belief that in the near future Canada would become an important field for the British Empire pictures.

Eskimo Census Taken

A census of the Eskimo people has just been completed. From the most reliable sources it is estimated that there are 7,103 Eskimos in Canada.

Many mothers have reason to bless Mother Graves' Worm Exterminator, because it has relieved the little ones of suffering and made them healthy.

Yesterday is a waste-basket into which lost opportunities are dumped.

BABY GIRL HAD DIARRHEA WHEN CUTTING TEETH

Mrs. A. J. Murray, Gull Lake, Sask., writes: "Last summer, my baby girl was cutting teeth and became very weak with the effects of diarrhea. I didn't know just what to do for her, as she couldn't retain anything. At last one of my neighbors said to me, 'Haven't you any . . .'"

why, I wouldn't be without it where there are children." "My husband went to town and got a bottle, and the very first dose helped her wonderfully, and in three days she was well over the diarrhea and was running around as well as ever." Put up only by The T. T. Millbrae Co. Limited, Toronto, Ont.

The Sioux Lookout Map Sheet

Where the Miner's Pick Now Displaces the Tomahawk

The Sioux Indians were among the handsmen as well as the most warlike of the aboriginal inhabitants of North America.

Their memory is perpetuated in the Sioux Lookout map sheet of the National Topographic series, now issued from the press of the Topographical Survey of Canada. The new map embraces an area lying 150 miles north from Lake Superior and adjoining the Lac Seul map sheet on the west.

The town of Sioux Lookout gets its name from the precipitous hill overlooking it. From the top of the hill, in days gone by, the Ojibwas whose land it was, kept watch up and down the waterways from raiding Sioux. On one occasion the lookout sent the Sioux fell upon the camp. They tomahawked the warriors to a man, and destroyed all the canoes. The women and children with one exception all man were marooned upon an island near the site of the present town, and there they starved to death. The island is still called Squaw Island.

This country with its broken lakes and streams, teeming with fish and abounded with rapids and waterfalls, is a tourist's paradise. Here are old fur trading posts like Osnaburgh House, founded over a century ago. At historic Lac Seul the chief factor of the Hudson's Bay Company has a four-hole golf course. (Ingress to the resort is by way of the Canadian National Railways and thereafter by innumerable connecting waterways with launches, tugs, or canoes.) This territory is part of the newly discovered mineral horsehoe—emphasized on the area known as the great Canadian shield.

The Sioux Lookout map sheet of the National Topographic Series, on the scale of four miles to the inch, may be obtained in sheet form from the Topographical Survey, Department of the Interior, Ottawa, for the nominal fee of 25 cents. If desired in folder form or linen backed the fee is 50 cents.

For Both House and Stable

There is a good deal of similarity, physically speaking, between human beings and the lower animals. Both are subject to many ailments arising from inflammation and to all manner of cuts and bruises. Dr. Thomas' Electric Oil is an entirely reliable remedy for such ailments and mishaps in both human beings and the lower orders of animals.

A Great Germ Carrier

Common Housefly Covered With Deadly Disease Germs Says Scientists

The common housefly is literally covered with bacteria and deadly disease germs. Scientists have estimated that many flies carry as many as 6,000,000 germs. This estimate is determined as follows: A fly is placed in a small bottle of water. The bottle of water is then shaken so that the germs will all be washed off the fly, and they will be equally distributed throughout the water. A tiny drop, perhaps a millionth part of the water, is then placed on a glass slide and examined under a powerful microscope. The scientist counts the number of bacteria visible, say six. He then multiplies the six by 1,000,000, since there are about 1,000,000 such drops in the bottle, and his answer is that the fly carried 6,000,000 bacteria.

Manx, the native language of the Isle of Man, is dying out; fewer than 1,000 of the island's 50,000 inhabitants have now any working knowledge of it.

Singapore? Use Minard's Liniment.

France Has Too Much Coal

Production Rises Until There Is No Need To Import

France, desperately short of coal for ten years, and always an importer, now has too much of it. For the first time French production equals consumption and imported coal is threatening to break the market.

When the Germans flooded French coal mines in the north during the World War, France lost half of her fuel and it has been a long struggle to get back to normal. Not only was the pre-war figure of 40,000,000 tons annually reached, but last year it went up to 60,000,000 and the Saar Valley has added another 13,000,000 tons.

All European coal mines have been working hard since the war because British strikes, the occupation of the Ruhr and the trouble in Upper Silesia created big shortages. Now that all are at work, Europe, according to French figures given to the League of Nations recently, has a surplus of 60,000,000 or 70,000,000 tons a year.

As all countries for generations have considered France as an importer of coal, they still try to capture the market there, ignoring the fact that France now mines all she burns. Therefore the French coal operators are puzzling how to reduce costs; curtail production and restrict imports so coal won't become too cheap.

Railways Arrange New Circle Tour

Convenient Visit To Glacier, Waterton and Jasper Parks Is Made Possible

An arrangement has been completed by the Great Northern and Canadian National Railways to make available to tourists a circle tour of three of the greatest playgrounds in the world. Under it tourists will be able to visit Glacier National Park, Alberta, without loss of time and at a considerable reduction in cost.

The inter-change point between the two companies will be Calgary where passengers for Jasper will take the Canadian National Railways and those for Waterton and Glacier will take Great Northern automobiles. The auto and the train will make connections and summer tourist fares will apply in both cases. In the past it has only been possible for travellers to combine these places in one visit by making a round-about and expensive trip.

In Glacier and Waterton Parks the Great Northern Railway operates a number of splendid hotels, among which are The Prince of Wales Hotel, the Glacier Park Hotel, and the Many Glaciers Hotel. In Jasper, the Canadian National Railways operate Jasper Park Lodge, a unique and distinctive summer resort.

Dust Causes Asthma. Even a little speck too small to see will lead to agonies which no words can describe. The walls of the breathing tubes contract and it seems as if the very life must pass. From this condition Dr. J. D. Kellogg's Asthma Remedy brings the user to perfect rest. It relieves the passages and normal breathing is firmly established again. Hundreds of testimonials received annually prove its effectiveness.

Find Blue's Best Color

Blue is the most effective color to attract policemen at night, according to tests made by city officials of Sheffield, England. The city has just installed in outlying districts booths surrounded by powerful blue lamps, which when lighted by a switch in central office, summon the policemen from their beats to nearby telephones to receive instructions.

A Fish Pool

Latest Development In the Co-Operative Movement In Manitoba

A fish pool is the latest development in the co-operative movement of Manitoba, and after being talked over for years, the Manitoba Co-operative Fisheries Limited has been established. Heretofore all the energies and abilities of the men engaged in the industry in Manitoba have been directed almost wholly to the production end of the business, but now attention is to be paid to marketing.

Whether the corn be of old or new growth, it must yield to Holloway's Corn Remover.

Convicts Are Good Students

A convict who was admitted to the Prince Albert prison some months ago could not read or write. At the end of his first year his education had progressed sufficiently for him to gain Grade IV standing. There were 24 prisoners started who could not read or write English. Seven passed their Grade III exams, six their Grade II, eight their Grade I, and several others were released during the year. Three men wrote Grade VIII, exams and two of them passed, one with honors.

Every Home Needs Minard's Liniment

The largest concrete slab in the world has just been made to form the roof of a Masonic temple. The slab is 78 feet 8 inches wide; 110 feet long and 14 feet 6 inches deep. The supporting columns are 40 feet high.

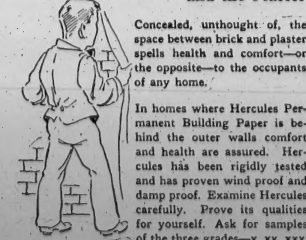

Between the Brick and the Plaster

Concealed, unthought-of, of the space between brick and plaster spells health and comfort—or the opposite—to the occupants of any home.

In homes where Hercules Permanent Building Paper is behind the outer wall, comfort and health are assured. Hercules has been rigidly tested and has proven wind proof and damp proof. Examine Hercules carefully. Prove its qualities for yourself. Ask for samples of the three grades—xx, xx, xxx.

Canadian Arctic Explorer Heads Expedition For Purpose Of Locating the Magnetic Pole

In quest of treasure relics and to conduct important Arctic research work, Major L. T. Burwash, war veteran, Arctic exploratory engineer and Canadian government official, will leave shortly on a 5,000 mile jaunt to end at the magnetic pole.

Travelling by rail, boat and dog team, Major Burwash will traverse nearly 300 miles of icy Arctic waters, with only native Eskimos, a stray trapper or fur trader, to assist him to navigate a forty foot government launch. His destination is the magnetic pole cannot be reached until late in September or October. His task will not be completed before the autumn of 1923.

At "the top of the world," Major Burwash will make a scientific examination to determine the extent to which the magnetic pole has shifted since Amundsen made his investigation about 1908. Each year the magnetic pole varies in a westerly direction; and its present position, once secured, will be noted on the charts of mariners who ply the seven seas.

Records of the ill-fated expedition of Sir John Franklin—central figure in the chapter of Arctic exploration of the nineteenth century—will also be sought by Major Burwash. The two ships "Erebus" and "Terror," carrying the Franklin party, met disaster near the magnetic pole in 1845. Some of the records were found on Boothia peninsula; and it is said that one of these ships may be seen in the Arctic ocean somewhere near King William Island or Boothia Peninsula. If this theory is found to be correct, the ship may be lifted to obtain for Canada the invaluable records and relics believed to be aboard her.

Conditions among the Eskimos north of the districts of Mackenzie and Keewatin will be examined by Major Burwash; and his survey in that district will be the first since the care of the Eskimos was transferred from the Indian department to the North West Territories and Yukon branch early this year. An examination of navigating conditions in Franklin Strait and Peel Sound will be made; and, in addition, Major Burwash will investigate the proposed tractor-train route from Wager Bay on the west coast of Hudson Bay to Cockburn Bay south of King William Island.

Use Modern Methods

Birds Ride On Airplanes and Horses

Airmen find that birds are not afraid of airplanes as they used to be. Now the birds make use of them to help them along in their flights. It is not uncommon, airmen say, to find ten or twenty birds hooking a ride, all comfortably settled on the machine and being relieved of much effort and fatigue on a long flight.

Not long ago we saw two horses being hauled to market on a motor truck at a swifter pace than any horse ever travelled before. They seemed interested in the scenery. —Capper's Weekly.

To Preserve Children

Take one large grassy field, one half dozen children, two or three small dogs, a pinch of brook and some pebbles. Mix the children and dogs well together and put them in the field, stirring constantly. Pour the brook over the pebbles and sprinkle the field with flowers. Spread over all a deep blue sky and bake in the hot sun. When brown remove and place in a bath tub to cool. —Health Bulletin.

First Lamb—"Do you suppose it's safe to go onto that lawn while the dog's asleep?"

Second Lamb—"Well, I wouldn't gambol on it."

"Look here, why are you following me about all day?"

"For protection. My wife has threatened to beat me!"—Buen Humor, Madrid.

W. N. U. 1740

A YOUTHFUL RULER

Martanda Sydney, 12-year-old son of the late Rajah of Pudukota. The rajah died recently of internal complications in the American hospital at Neuilly, Paris. The rajah was 53 years old. He was the ruler of the Indian province of Pudukota, but had his residence in Cannes, while his brother acted as his regent. Martanda Sydney will assume the position held by his father.

Turning the Tables

Automobilist Receives Bill For Damage Done To Locomotive

Tony Straber's warning to automobile owners is this: When driving your car into a railroad train be careful not to damage the locomotive.

Tony's car and a Grand Trunk train were involved in an argument over the right-of-way at Western Avenue near 104th Street, Chicago, last November. The automobile wound up in a ditch in a status described by wreck writers as "twisted wreckage."

Recently Tony got a letter from the Grand Trunk Railroad. It made no mention of his automobile, confining itself to the following succinct sentence:

"Inclosed please find bill for \$29.18 for damage to our locomotive No. 6038."

Getting Over The Difficulty

A man who had great difficulty in spelling words that had "el" and "le" in them mentioned the matter to a friend.

"Oh," said the friend, "I have a splendid remedy for that. It's infallible, too. I've used it for years and never been let down yet."

"The first man expressed his delight and interest, then waited for enlightenment."

"The rule is this," the friend declared: "Write your 'l' and 'e' exactly alike, and be sure and put your dot exactly between the pair of them."

Not Much Competition

The immigration official was examining an Englishman on his arrival in New York. "And what do you propose to do now you are in the United States?" he inquired.

"Oh, I don't care," replied the Englishman hopefully. "Anything to earn an honest living." "Well, come along in, then," said the official. "I guess there ain't much competition in your line of business."

Up-To-Date Shop

Fifth Avenue, New York, has a shop dealing exclusively in aviation products and accessories. Everything is for sale, from airplane goggles to a commercial ship. The shop maintains hangars on Long Island with a corps of instructors to teach those who make purchases.

The keener the critic the more cutting the criticism.

ALL FOODS CONTAIN WATER

Body Gets Sufficient Even If People Drink Little

Water is absolutely essential if the body is to keep up its activities. It is necessary not only to aid in building up the tissue, but in order to permit the carrying on of all of the chemical and physical functions that take place.

Most of us get more water than we drink as such through the fact that practically every food substance contains some water and most of the beverages are practically entirely water. Milk contains 85 per cent. water, wines anywhere from 85 to 95 per cent., and even distilled alcoholic drinks are usually more than one-half water.

If both food and water are withheld, life cannot be prolonged for more than eight or ten days. With air and water life can be prolonged for a considerable time, even though food is not given. Professional fasters always drink water during the starvation period. Some of them carry on from three to five weeks without food.

Milk is probably the best of all beverages, particularly when it is taken from properly inspected cows under sanitary conditions, transported under clean conditions to the place where it is used, and pasteurized in most instances before use.

Lemonade and other drinks made from citrus fruits are excellent because they contract acidity in the body and serve as a valuable source of vitamin C.

Tea and coffee are good beverages if taken in moderation; if taken in excess, overstimulation may result due to an overdose of the drug called caffeine, which has the power of stimulating the higher centres of the brain. Tea varies in its qualities according to the manner in which it is prepared.

One expert recommends that the proper way to make tea is to pour it off the leaves after five minutes, putting it in another warmed teapot.

Soda water, pops and similar beverages have a certain value; due to the amount of carbonate they contain.—By Dr. Morris Fishbein.

Sure To Be Successful

It is really becoming more difficult to persuade young doctors to practice in the country. Young doctors who have plenty of courage and are determined to succeed and who go to settle in the country and practice their calling there in an intelligent manner make a quicker and bigger success than three-fourths of their colleagues who have settled in the cities. If they do not actually attain great fame, which is reserved for a few, public life often takes hold of them, bringing honors with it.

Must Have Been Some Clock

The Provost of the little Scottish town was noted for his unhappy choice of phrases, but he excelled himself on the occasion of the presentation of a clock and a purse to a local resident who was leaving the town.

"The contents of the purse," said the Provost, "will in time inevitably disappear, but," he added, placing his hands on the clock, "there is something which will never go."

PREMIER OF NEWFOUNDLAND

Hon. W. S. Monroe, premier of Newfoundland, is to resign office next month, it is reported. Pending a general election in the fall he will probably be succeeded by Sir John Bennett, colonial secretary.

Asphalt Highway Across Canada

Union of Canadian Municipalities Has An Ambitious Program

Immediate construction of an asphalt highway right across Canada was urged at the 25th Annual Convention of the Union of Canadian Municipalities at Winnipeg. Dominion and Provincial Governments will be memorialized as to the necessity for such a road. It is estimated that the cost would be \$20,000,000 and construction would occupy five years. It would afford to motorists access to much of the most beautiful scenery on the continent, and in view of the vast number from the United States who are now touring in Canada each summer the expenditure would not be without direct financial returns.

Developing Talc Industry

Establishment Of A Manufacturing Plant In Calgary Is Being Considered

National Talc, Limited, is considering the establishment of a manufacturing plant in Calgary to utilize the raw talc deposits of the Rocky Mountains. About seven miles of the new road up the Red Earth Valley from Massey to the blue talc property on Red Mountain were constructed last summer and work is again proceeding with the idea of completing the road by August. Production will be started on the blue talc property as soon as weather conditions permit. The American Lava Corporation of Chattanooga, Tennessee, are reported willing to purchase all of this year's production of the plant.

Spain Insures Travellers

Beginning July 1, all persons travelling by rail or water in Spain will be insured against accident, the cost being added to the price of boat or train tickets. The insurance covers injuries to passengers, first and carrier employees next. Proceeds will be devoted to an agency encouraging tours in Spain.

Footprints, taken on the lines of our fingerprint system, are now being used for identifying criminals in Ceylon.

Geographical Misconceptions That Have Retarded The Development Of Canada

Long-Waisted Slip-On Dress

Long-waisted slip-on dress, with open neck and diagonal pin tucks. One-piece, long dart-fitted sleeves or short sleeves. Attached three-piece skirt. Separate belt. Two cascade trimming pieces stitched to left side of waist and skirt. For ladies and misses.

Sizes 16 years, 36, 38, 40, 42 inches bust.

Size 36 requires 3 yards 36-inch material with long sleeves. Price 25 cents the pattern.

Our Fashion Book, illustrating the newest and most practical styles will be of interest to every home dressmaker. Price of the book 10 cents the copy.

The fact that Nero was a fiddler instead of a saxophone player must have been some satisfaction to the Romans.

Great political reforms are set in motion by the hand that rocks the cradle.

FOLKSONG AND HANDICRAFT FESTIVAL

This orchestra playing Ukrainian airs, the members of Ukrainian origin and arrayed in peasant costume of that country, made a great hit at the New Canadian Folk Song and Handicraft Festival, held at the Royal Alexandra Hotel, Winnipeg, from June 19 to 23. Over 400 performers, representing different European nationalities, participated.

Partial knowledge and assumptions based on insufficient data have been responsible for many mistaken judgments and belief in obstacles that had no real existence. Evidence of this abounds in the pages of history, and the process of revising and rectifying long-established opinions continues with little sign of abatement. Until recently belief persisted that the interior of the island continent of Australia was a rocky and barren desert, where explorers ran grave risk of perishing miserably for lack of water. Now, with more extensive and accurate knowledge, the vast central region of Australia has assumed a widely different aspect, with many districts well adapted for productive use and with ample water resources, that only need to be tapped to make the wilderness blossom as the rose.

Canada is now undergoing a similar process, with the result that many obstacles to unification of interest, once deemed insuperable, are now disappearing in the light of better knowledge. Not so long ago men whose views were regarded as authoritative saw in the clay-mountain North Ontario and in the so-called barren lands of the great Northwest barriers that doomed Eastern and Western Canada to perpetual isolation, one from the other. These imaginary barren and infertile tracts occupied an area amounting approximately to one-sixth of the total area of the Dominion. Until recently these ideas remained fixed convictions in the minds of most Canadians, accepted as hardships imposed by nature and incapable of more than alleviation to a limited degree. Gradually, through the penetration of these regions by the surveyors and prospectors of the topographical survey, it has increasingly become evident that the older conception is due for radical revision.

Officials and travellers, in the days when Central and Western North America were, unknown quantities, often registered judgments for reasons that now seem ridiculous. A British official is said to have condemned the territory, now occupied by the states of Oregon and Washington, as worthless because the fish of one of its numerous streams would not rise to a favorite artificial fly. Hence the name "Barren Grounds" came to be applied to what has been proved to rank among the most fertile areas in the world, is contained in the account of the exploratory journeys of Henry Kelsey in the last quarter of the seventeenth century. Among that traveller's longest journeys came one between 1690 and 1692, when he journeyed from Port Nelson on Hudson's Bay westward by way of the Hayes and Saskatchewan rivers. Undertaken primarily to investigate the fur trade possibilities of the country, its agricultural potentialities never seem to have dawned on him.

A thousand miles north of Kelsey's route, beyond the forested lands of the Canadian west and stretching to the Arctic Ocean and Hudson's Bay, are the Great Northern plains to which his descriptive epithet has been mistakenly transferred. The picture drawn by the explorers of today, remarks the Brandon Sun, reveals a tract of gently undulating country with lichens and mosses on the hills, and shrubs, flowers and grasses flourishing in the valleys. True, no trees grow north of the timber line, and certain areas lack vegetation. But the greater part of the region is so far from being barren that it actually supports at the present time, in addition to the fur-bearers and musk-oxen, hundreds of thousands of caribou.

German Has Gargoyle Clock

Stettin, Germany, the home town of Otto Peltzer, the great runner, has one of the most unique tower clocks in Germany. In the centre of its huge dial there is the terrifying face of a bearded man who every second rolls his eyes from right to left like a bogey man. In his opened mouth he holds a metal plate on which the day of the month is recorded. The clock bears the inscription 1736.

Calgary Flying Field

The City of Calgary has decided to purchase a flying field on the north hill almost overlooking the Bow River. It affords an ideal jumping off place for aircraft. Weed inspection from airplanes is the latest device under construction by the Alberta government. Fields infested with stinkweeds are conspicuously discernible from the air from their contrast with clean fields.

at Low Cost

If you could have exactly the kind of car you wanted, what are the features you would demand?

You would want Performance... stamina to stand long, trying trips.

Then you would want Style, of course—the latest trend in body design—long, low, racy lines—the newest and most modish colorings. You would want the distinction of Body by Fisher.

And you would like a Luxurious car... one with wide, deep cushions that invited rest... with rich and beautiful upholstery and fine interior appointments... one with snug protection against the weather with ease and smoothness of riding.

Last, but by no means least, you would demand Quality... substantial construction... refinements such as Four-Wheel Brakes, Air-Cleaner, Oil Filter, Crankcase Breather, Vacuum-Feed Fuel Supply, Safety Gasoline Tank in rear and so forth... dependability at all times and under all conditions.

These are the things everyone would like to have in a car... and that everyone CAN have, for the first time in automobile history, at the low cost of the "Bigger and Better" Chevrolet.

The G.M.A.C. General Motors' new deferred payment plan offers the most convenient and economical way of buying your Chevrolet on time.

19th BATTALION (EDMONTON REGIMENT) ASSOCIATION 2nd ANNUAL CHURCH PARADE

The second annual church parade of the 49th Battalion Association will be held in Edmonton on Sunday, July 22nd next. The parade will assemble at the Memorial Hall at 10 A.M. precisely. All ranks will "fall in" in their former companies.

Dress—Civilian clothes will be worn with medals and decorations. The service will be held on Parliament Hill Park, out of doors, so that all relatives and friends of the members may have an opportunity of taking part in the service. After the parade is dismissed the members of the Association will take luncheon together at the King Edward Hotel.

After luncheon the Brass band of the 49th Battalion will give a band concert in front of the Memorial Hall to which the members and their relatives and friends are invited.

Special rates on the railways of a fare and a third for the round trip for the Edmonton Exhibition will be in force, if purchased between July 14 and July 21st for trains reaching Edmonton not later than 2 p.m. July 21st. These tickets are good until July 24th.

The Service Battalion will supply the old Battalion colours with a new party, the brass band and the pipe band and an escort.

The Sunday selected for this parade is the Sunday which closes the Edmonton Exhibition week and it is thought that many old "Bers" will take in both the exhibition and the parade.

Last year this parade was a great success and attracted much favorable notice. This year it is hoped that still greater success will attend the efforts of the committee.

Every man who at any time served in the 49th Battalion C.E.F. is eligible to attend this parade and is urged to do so. "Old 'Bers" will meet old friends and comrades that they have not seen for years. Old times, old friends—Old stories. It is an indeed to stand shoulder to shoulder again and to march to the strains of "Bonny Dundee" played by the "Good old band." Major General H. H. Griesbach C. B. will command the parade.—Earle Hay, Honorary Secretary.

SPECIAL TRAIN TO EDMONTON FAIR THURS. JULY 9th, FARMERS' DAY

The Canadian National Railway, ever ready to give service to the public, will run a special train to the Edmonton Fair on Thursday, July 19th. The schedule of the train is as follows:

Leave Wainwright 6:45 A.M.
Irma - 7:22 A.M.
Viking - 8:15 A.M.
Bruce - 8:39 A.M.
Hulden - 8:59 A.M.
Ryley - 9:20 A.M.
Tofield - 9:50 A.M.
Arrive Edmonton - 11:30 A.M.
Returning will leave Canadian National Depot at 11 P.M.

Excursion rates will apply. If you are going to spend a day at the fair this is a good chance to go and come back the same day.

NOTICE

In the Estate of WILLIAM TOMLINSON, late of the Village of Caro, in the state of Michigan, one of the United States of America, Farmer. Notice is hereby given that all persons having claims upon the estate of the above named William Tomlinson who died on or about the 11th day of March A.D. 1927 are required to file with Earl Tomlinson, Administrator of the said estate at Irma, Alberta, by Saturday the 18th day of August A.D. 1928 a full statement duly verified of their claims and that after that date the Administrator will distribute the assets of the deceased's estate among those entitled thereto, having regard only to claims of which notice has been so filed and brought to the knowledge of the administrators of the said estate.

Dated at Viking, Alberta this 5th day of July A.D. 1928.
—C. G. PURVIS, Solicitor for the Administrator.

TEN YEARS AGO

From Irma Times, July 12th, 1918. The Orange Lodge attended Irma Church for divine service.

Mr. B. Thompson held an auction sale.

Mr. Olaf Larson completed concrete work for his new house.

Miss Hilma Christenson returned home after resigning her position at Bawlf.

Mr. Henry Kasten was building a new implement shed.

FIVE YEARS AGO

From Irma Times, July 7th, 1923. A daughter arrived at the home of Mr. and Mrs. R. J. Tate, July 17th.

Mr. G. A. Sisson had a number of teams working on the gas line to Edmonton from Viking.

CROP REPORT FROM BANK OF MONTREAL

Crop conditions generally fair throughout the Prairie Provinces continue to be satisfactory. All grains are making rapid growth and early sown wheat in the southern areas is heading out. In Quebec all crops are making satisfactory progress under favorable conditions. In Ontario, meadows, pastures and spring grains have been improved greatly during the past week, in fact, spring grains look better than for years past at this time. In the Maritime Provinces crops everywhere are making excellent progress. In British Columbia all grain and root crops are promising and pasturage excellent. Details follow:

Alberta: Western and Northern Areas: Conditions very promising, and there is ample moisture for some time. Southeastern Area: Prospects are very promising, and in some cases the wheat is heading out. Saskatchewan—Northern Area: Crops progressing well in good growing weather; much wheat is in shot blade. Southern Area: Crops continue to make satisfactory headway. Wheat is mostly in shot blade, and some that was seeded early has headed out. Many points throughout the Province report weeds prevalent and troublesome. Manitoba—All grains are making strong growth. Wheat is in shot blade, and the early sown is heading out. Except for excessive moisture in some areas and prevalence of weeds, conditions are satisfactory.

NEW UNIVERSITY HEAD

Appointment of Dr. R. C. Wallace, professor of geology at the University of Manitoba, to the presidency of the University of Alberta, in succession to Dr. H. M. Tory who recently resigned to devote his entire time to the National Research Council, was announced on Monday by Hon. Perrin Baker, minister of education, in the absence of Premier J. E. Brownlee.

In making the announcement, the Minister said that the appointment finally was decided upon by the government after a most careful survey of the university field, both in the east and west, and even including those Canadians prominently identified with university life in the United States.

Dr. Wallace brings to the position of presidency, not only a high degree of scholarship, but also a wide experience in administrative work outside the usual field of university activities.

Edmonton Fair

The Natural Resources Department of the Canadian Pacific Railway have arranged for space for an exhibit of Canadian Resources at the Edmonton Exhibition, July 16 to 21. This will consist of all kinds of garden and field crops, flowers, etc., all of which have been grown and matured out of doors, not under glass, also a large variety of fresh vegetables and fruits. This is only one of the many interesting and educational exhibits that will be seen at this year's Summer Fair.

The Exhibition management have made a change in the regulations for District Exhibits and Government and Experimental Institutions are forbidden to take part in the Competition. As special class is arranged for such institutions and as a result both the Vermilion and Old Schools of Agriculture have already arranged for space for their exhibits. The Department of Agriculture, Ottawa, co-operating with the Canadian National Railway, are sending a very fine new exhibit. The Provincial Department of Seeds and Weeds are preparing an exhibit which will be very interesting in view of the present energetic campaign against the sow thistle and other of the weeds which help to keep the farmers busy these days. R. H. Ennismore is in charge of the demonstration which will be put on by the local office of the Dominion Live Stock Branch, showing egg candling, and a number of competitive exhibits in the nature of an egg-consumption campaign.

Nine district exhibits have been entered to date which are being shown in the Agricultural Building. This display will be wonderfully attractive and truly representative of the possibilities of agricultural production of Northern Alberta.

The Edmonton Horticultural Society have also made arrangements for a display which will be changed daily. The threshed grain exhibits will be shown under a new system of small boxes covered with glass. New show cases for the Women's exhibits have been installed and more space reserved for exhibits of commercial manufactured goods than ever before in the history of the Exhibition.

TENDERS WANTED

Tenders wanted by August 1st for the hauling of about 12 yards of gravel, making concrete for the new school house foundation. Tenders of Secretary, T. Sanders, Sunny Brae School District, Irma.

WEEKLY NEWSPAPER MEN

MEET AT EDMONTON

The weekly newspaper editors of
the dominion held their convention at
Edmonton last Wednesday and Thurs-
day at which there was a good attend-
ance from every province in the do-
minion. The usual courtesies were ex-
tended by the railroads in assisting
to make the convention a success.

The convention was opened with a
welcome from government and city
officials after the routine business of
the convention was taken up under the
leadership of Mr. Wynn, president of
Yorkton, Sask. During the two days
several very fine dinners and lun-
cheons were enjoyed ending up with
a dance at the MacDonald hotel ball
room. On Thursday evening the ma-
jority of the delegates entertained for
Jasper where a pleasant holiday was
spent in pleasant surroundings.

Mr. H. B. Anslow, of Campbelltown,
N.B. is the new president, and E. Roy
Sayles, of Renfrew, Ont., is Secretary
manager. The directorate consists of
members from each province. Each
year the association holds their annual
convention at some important point
in Canada east or west, so that the
editors may get well acquainted with
every part of the dominion.

Viking

The local Astronomer reports that
the sun is badly marked by spots at
present, his face showing huge eruptions
in eight places. Through the
telescope these great spots, appear
in varied form, some being quite
round while others are elongated.
Just what effect these spots have upon
the sun which in turn is transmitted
to the earth is not fully known.
Scientists agree that the Aurora is
part of the result at least. The won-
derful demonstration of this on Sat-
urday night was one of the finest on
record. Hundreds of citizens and
farmers around Viking watched this
with keen interest. Living as far
north as we do, brings us this com-
pensation, for in more southerly lati-
tudes the Aurora is never so beauti-
ful as at Viking.

Miss McLean, representative of Can-
adian chautauqua, was in town last
week and secured enough guarantors
to hold a Fall Festival here some time
in November. It is the intention to
hold a four day program in Re-crea-
tion hall. The talent will be picked
from the best now appearing on the
summer chautauqua programs. Tick-
ets will be sold in advance as usual.

According to figures supplied by W.
H. Fisher, official weather observer,
2.17 inches of rain fell from Wednes-
day to Sunday evening. This is a lot
of rain and will do a million dollars
worth of good. Another good rain the
latter part of this month or early
August will assure the crop.

The Viking Elks ball team that
made such a good showing at the Wes-
tern baseball tournament last Tues-
day and Wednesday are returning to
that city on August 15th to complete
the tournament which was abruptly
ended by a heavy rain. The team won
easily from Innisfail by the score of
15 to 3, and are to play the winners
of Red Deer-Wetaskiwin on the 15th
of August.

The Stampede and Picnic under the
auspices of Woodville, U.F.A. and U.F.
W.A. which was postponed on July
4th will be held on July 18th. The
cattle events will be eliminated but
other sports will be added. A dance
will be held in the schoolhouse at
night.

A real good baseball tournament will
be held at Viking on Wednesday, July
25th. Seven teams from Ryley, Vegre-
ville, Mannville, and Viking will com-
pete for a purse of \$150.00; 1st prize
\$100.00; second prize \$50.00.

Several of these teams are taking
part in the Camrose baseball tourna-
ment the following three days, and
local fans will have a chance to see
them in action right on our own
grounds before they go to Camrose.
Viking Elks will have their team up to
strength for the Camrose tournament,
so come and see them in action.

It is expected that Premier Brown-
lee will be here that day and address a
meeting.

Arrangements are now well under
way for Viking's annual Fall Fair and
Exhibition which will be held on
Thursday, August 16th, one day. At
a previous meeting of the directors it
was decided to hold a one day fair.
In former years there has been consid-
erable objection to having to bring in
stock, poultry and other exhibits for
two days, so this year, it is the inten-
tion to have one big day.

The copy for the prize lists is now in
the hands of the printers and is being
rushed to completion. There are a
few changes in one or two of the horse
classes, and a few in the domestic and
ladies work classes, otherwise the
list and prizes are very much the
same as last year.

One drastic change however in the
matter of entry fees was made which
will meet with the approval of all ex-
hibitors. Heretofore there has been a
graduated scale of fees charged but
this year the board decided that only
ten per cent of all prize monies will be
retained as entry fees, regardless of
the amount won or in what class.

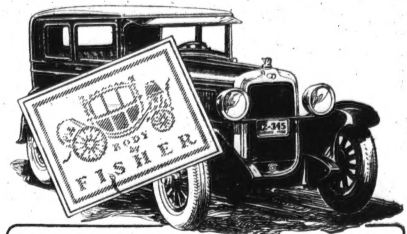

There is also being arranged a
full line of sports in connection with
the fair, and altogether it should
prove a real day's outing before the
harvest work sets in.

Everybody boost the fair.

After a lingering illness of several
months William John Bell, of Ross-
garland district, died in the Viking
Municipal Hospital on Friday last.
Funeral services took place on Mon-
day at the United Church and the Vik-
ing Cemetery under the direction of
Rev. J. W. Binkley.

Mr. Bell was born in Sandwich, On-
tario 34 years ago, and came west in
his early boyhood. After living for a
time in Strathcona, Vegreville and
Ashmont, he, along with his family,
has been a neighbor in this district
for a considerable number of years.
He is survived by his mother, one
brother and two sisters.
The district was well represented
at the funeral services in sympathy
for the bereaved.

The Viking Elks ball team has been
entered in the Camrose baseball
tournament at Camrose July 26, 27th
and 28th.

Another Way to Say the Finest of Low Priced Sixes

JUST as the "sterling" imprint on silver
identifies the best, so the mark of Fisher
on its bodies distinguishes a car from
others in its field. When you speak of
Pontiac as the lowest-priced six with
bodies by Fisher, you are merely finding
another way to say—"the finest of low-
priced sixes."

For no other six of such low price offers
the score of advantages which make the
Pontiac Six the value leader of its entire
class. Certainly none other offers any
major feature comparable to the staunch,
smart coachwork that the Fisher emblem
represents.

Not only in style and color—not only in room-
iness and luxury of interiors—but also in
sturdiness and quality of construction, Pontiac-
Fisher bodies establish a standard never before
attained in a six at Pontiac price. Like Pontiac
itself, they are noted for ruggedness and long
life. Like Pontiac itself they provide every
element required for complete satisfaction and
for justifiable owner pride.

WORLD HAPPENINGS
BRIEFLY TOLD

The new German dirigible, LZ-127, may make a trip to East Asia by way of Canada.

Mess Mercedes Glettoz, London stenographer, failed in an attempt to swim the Irish Channel to Great Britain.

Assurance that representations made on behalf of the blind in Canada will receive government consideration has been given to a delegation of blind persons by Hon. J. A. Robb, Minister of Finance.

The King has approved the appointment of Sir John Middleton as Governor-General and Commander-in-Chief of Newfoundland, in succession to Sir William Allard, whose term has expired.

The University of Wisconsin, at Madison, gave recognition to the attainments of its most celebrated former student, Col. Charles A. Lindbergh, by conferring the honorary degree of Doctor of Laws. Lindbergh arrived there by plane.

Fritz Von Opel's rocket car, the Rak-3, was wrecked, but not until it had attained a speed of 158 miles an hour. This is claimed as a world record on rails. There was no driver in the car.

England's most picturesque visitor, Sir Olaf Atter, blue-blooded potentate of Abim, Abukawa, has received from the King at Buckingham Palace the accolade of his new British knighthood.

Col. Charles A. Lindbergh carries a blanket public liability aviation insurance policy to the amount of \$100,000 on any aircraft piloted by him. The policy also covers him for property damage.

Fur-bearing animals in Ontario are growing scarcer each year. As frontiers of civilization move forward, it is indicated in a statement issued by the Department of Fish and Game, which shows that royalties received last year totalled \$112,702, compared with \$130,793 in 1926. With the trapping of beaver eliminated the amount is likely to be still smaller for 1928.

How Far Voice Will Carry

Depends On Atmosphere, Wind and Competing Noises

The distance to which a man's voice will carry depends upon many different circumstances. The condition of the atmosphere is one—damp will slow down the sound-waves, while a dry, crisp air will forward them easily. Wind is another factor—so is the height of the speaker in regard to the number of objects, rocks and so on in front of him. The number of competing noises also has to be considered. Under ordinary circumstances, few voices will carry infelicitously much over a couple of hundred yards, but this distance has been far exceeded with exceptionally favorable conditions. In the stillness of the frozen North, for instance a voice will carry for over a mile. And a song as rendered from a mountain top, was once heard at a distance of four miles.

Question of Relationships

In a recent court case at Toronto, a nice question in relationships was propounded. The plaintiff, a woman, was testifying against a chauffeur. "Isn't he your brother-in-law?" she was asked by counsel. "Didn't you say he was?" "No, I said he was my husband's sister's husband's brother!" The counsel gave up any more questioning on this point.

It has been estimated that a hospital doctor walks an average of 16 miles a day in the course of his duties; a shop assistant eight miles; a waiter 12 miles, and a tram conductor seven miles.

Raw recruits are probably so called because they are not accustomed to fire.

Mistress: "Is there anything we require from town?"

Maid: "Yes, the china will not last us over Sunday."—Rasper, stockholm.

Farmers' Marketing Tour

Canadian National Railways' Tour To Great Britain and Denmark, 1928

(Continued.)

New experiences awaited us the following day when as guests of the Port of London Authority, we were taken to see something of what London's handling facilities are. It was not possible to see more than a small part, for the Port of London, in one year, handles merchandise to the value of hundreds of millions of pounds sterling. For example, the imports and exports passed through the port in 1926 totalled in value \$3,500,000,000 and included 65,000,000 bushels of wheat. In the same year 20,000,000 tons net register of shipping entered and left the port. Walking through one set of showrooms, ten acres in extent, we visited the Ivory Room, where we were astounded to see a perfect specimen of prehistoric mammoth tusks 11 feet long, weighing 160 pounds, and having an estimated age of 56,000 years. In the State Room \$25,000 worth of paper was stored, and an interesting exhibit was a 28 lb. weight floating in a bath of mercury. The Wool Room which contained a number of boxes of Canadian wool stores in a single year nearly 2,000,000 bales.

Another interesting warehouse was the Lining Room, holding 25-30,000 small hide-bound kegs of indigo, every one worth \$500. The hide covering is necessary because of the rotting effect of indigo which destroys the wooden kegs in a comparatively short space of time.

But the thrill of the day came when we explored a portion of the Port's wine vaults. Before descending to the cellars we were handed oil torches fastened to the end of staves. Torches such as these have been used for 120 years. The temperature of the vaults never varies from 50 degrees, yet the only means of regulating it are incandescent lights, and the amount of sawdust on the floor. Fungus produces on the roof of the cellars by the fumes of the wine is a curious characteristic. In the brandy vaults this fungus is absent. Twenty-two thousand pipes of wine, each worth \$500 can be accommodated in these vaults which represent twenty-eight million dollars of spirits contained in other vaults not included in the day's itinerary.

Again in the open air we boarded a launch en route to the S.S. Minnawaska, where we were due to lunch. Guests of the Port of London and the chairmanship of Lord Ritchie of Dundee. The novelty of luncheon on this beautiful ship, surrounded by great liners from almost every country in the world made a deep impression. This was followed by a river trip back to London.

In the evening we were the guests of the Empire Marketing Board at dinner in the Hotel York Hotel and had an opportunity of learning at first hand the valuable work being done by this organization to encourage the consumption of our products produced within the Empire. The sum of five million dollars per year has been placed at the disposal of the board to further the marketing of Empire products. The Board is a non-party body and includes representatives of the Dominion and Colonies. Agricultural research is also an important phase of its work. The chairman, on the occasion of our visit, was Lord Lovat, the Under-Secretary of States for the Dominions. He told us something of the work of the Board, which was further explained by Sir Halford Mackinder, chairman of the Imperial Economic Committee.

The next day's programme provided one of the most interesting moments of our stay in London. This was a visit to the Tower, a grim fortress which we entered with mixed feelings, for here and on Tower Hill perished some of the most renowned men and women of their day. Here the beautiful Anne Boleyn was beheaded, and here John, Duke of Grey saw the headless body of his husband carried past her on the morning when she knew that she was to die. In it Sir Thomas Moore, Archbishop Cranmer, Sir Walter Raleigh and the little Prince met their tragic fates, and though these things happened the days gone by, one feels the Tower to be sinister still. Even in our own time it was not chosen as the place in which the spies in the Great War should meet their doom.

We were admitted by Yeoman of the Guard "Beefeaters" who still wear the quaint uniform which was adopted in the time of Henry VII. We were shown the Bloody Tower where the bones of the two murdered Princes were found and the room (reconstructed), in which Sir Walter Raleigh, when a prisoner wrote his History of the World.

In the White Tower we saw the chamber in which Guy Fawkes and his fellow-conspirators were tortured in 1605. Here too, were the apartments occupied by Queen Elizabeth when she herself was a prisoner in the Tower. We saw the block and execution axes, one of which has a nick in the blade where it struck the neck of a victim. And then, how close to our Canadian hearts it came, we saw the cloak on which Wolfe died on the Heights of Abraham.

Many quaint forms are still retained in the administration of the Tower. The gates are shut at night to the accompaniment of ancient ceremonial and after midnight no one may enter the precincts without giving the password.

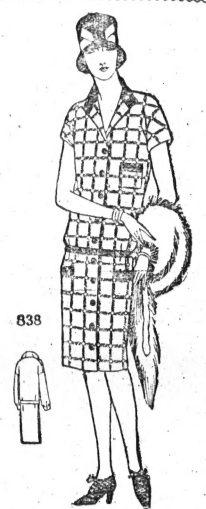

In one of the strong rooms of the Tower there repose the Crown Jewels, including the robes of King George and Queen Mary, a display of treasure which amazed us all.

The Tower of London was built by William the Conqueror, and it is said that the site on which it stands was selected by Julius Caesar as a location for his army. One of the most interesting features of the Tower

is the portcullis, said to be the oldest one in existence in working order. On our way to the Tower we stopped at St. Paul's Cathedral, Sir Christopher Wren's masterpiece, but owing to the grating operations on the piers which support the great dome, it was not possible to see its interior to advantage, most of it being boarded up and inaccessible. Thus, we did not see the crypt or enter the Whispering Gallery.

(To Be Continued.)

Nothing But The Best

Out-of-the-hell but still luxury-loving, Constantinople demands only the latest and newest models in automobiles. Some 11,000 second-hand cars are standing idle, waiting in vain for purchasers.

In addition to the "Duchesses" will "ford" three other "Duchesses" will shortly be commissioned and this fleet of Cabin Class steamers will constitute the largest ships to call at

STALWART HEBREDEANS

Three stalwart crofters, all over six feet in height, who left the Hebrides where they "scratch a bare living by tending sheep," to settle in Ontario. They reached Canada last week in high spirits. The picture shows some cabin boys comparing their stature with the settlers' aboard the liner Letitia, on which the Hebrideans arrived in Canada.

Recipes For This Week

(By Betty Barclay)

FRIZZLED BEEF FOR HOT DAYS

Melt butter in hot frying pan, add dried beef, and stir until it browns and curls. Add more butter for cream sauce. Add flour and stir until well blended. Add milk gradually until desired consistency is obtained. Stir to avoid lumps.

Use the proportion of 2 tablespoons of flour to 1 cup of milk. If the dried beef is too salty, soak for 10 or 15 minutes in cold water; drain thoroughly and dry by patting between folds of clean dry cloth. Have dry before adding to melted butter. Serve on toast if you wish.

ORANGE AND RHUBARB SAUCE

2 pounds rhubarb.
2 oranges.
1 1/2 cups sugar.
1 tablespoon granulated gelatine.
1 tablespoon cold water.

Wash rhubarb, cut into inch pieces; peel oranges, removing membrane with peel, and cut in small pieces; put rhubarb, orange, and sugar in an earthenware or glass baking-dish, and bake about one hour. Dissolve gelatine in cold water, add to rhubarb's mixture, and when cool, add individual pastry shells with sauce, and decorate with whipped cream, frozen through pastry bag and rose tube.

Came From Many Lands

Common Vegetables Were Not Used

Few centuries ago, as they do today. In those days the dishes consisted mainly of fish, fowl, or fowl.

Potatoes were introduced into England by Sir Walter Raleigh from Virginia, over 300 years ago. They did not, however, come into general use till the beginning of last century, when they were very wisely always cooked in their skins.

The Romans knew the onion, turnip, cauliflower, and cabbage, to which last vegetable they ascribed the quality of preserving them from drunkenness.

Cucumbers are said to have originated in India, and were known to have been introduced into China 200 B.C.

The carrot came from Greece, and the English name is derived from a Greek word meaning "root."

Changed Objectives

Of Wheat Breeding
High Yield Per Acre and Protein Content Are Objects To Be Attained

The objectives of wheat breeding have changed notably in the past century. According to the Food Research Institute of Stanford University, California, it was not until the advent and growth of world trade in wheat in the last century, and the introduction of the roller-milling process in the 1870's, that protein content of wheat received attention from the wheat breeder. Previously the objective had been high yield per acre. Today the objectives of the breeder are complex, and his problem difficult. High yield per acre and high protein content are characteristics not easy to combine. Moreover, wheat must be adapted to the locality in which it is grown. Hence the breeder must consider in breeding wheat for each region such problems as the development of resistance to fungous and insect pests, to drought, to cold, to hot winds, to a short growing period, and the like. Changes in agricultural technique such as the successive invention of the scythe, the cradle, the reaper, and the "combine" have called for the development of wheat that would not lodge and would not shatter its seed if allowed to stand in the field after maturity.

Wheat breeding did not become truly scientific until after 1900, when the laws under which the characters of the parents are transmitted to the offspring were not generally known though they had been discovered earlier. Nevertheless several excellent varieties were developed by more or less haphazard methods. With increasing application of the science of genetics to wheat breeding in the past twenty years, much progress has been made. The equipment of the wheat breeder to deal with changes in objectives as they arise has been greatly enlarged, and more progress may be expected.

Professor—"Frankly speaking, he got my caprine, hollow-horned ruminant."

His Wife—"What?"

Professor—"My goat!"

Alone a man can stand up for his right; but he must organize to find new rights to stand up for.—Oshawa Times.

Canada's Flying Clubs

Eleven Already Established and Ten More Being Organized

Hon. J. L. Ralston, Minister of National Defence, has opened the new flying field of the Granby Light Aeroplane Club, Granby, Que.

Canada now has 11 light aeroplane clubs, extending from Granby, Que., to Victoria, B.C., with ten others in process of formation. Fourteen Moth planes have already been allotted to these organizations by the Government under the conditions governing the issue of these machines. Additional to the Granby club, those already formed and with whom agreements have been signed by the Minister of National Defence are:

Montreal, Toronto, Hamilton, Ont., Winnipeg, Regina, Moose Jaw, Saskatoon, Calgary, Edmonton, and Victoria, B.C.

Clubs in process of organization are located at:

Halifax, Saint John, Quebec, Kingston, Ottawa, London, Peterboro, St. Catharines and Walkerville, Ont.

Alberta Act Invalid

Privy Council Upholds Ruling Of Supreme Court Of Canada

Both the appeal of the province of Alberta and the counter appeal of the Dominion of Canada from a Canadian Supreme Court decision respecting the question of whether the right of the Crown upon intestacy is a provincial or Dominion right were dismissed without costs by the judicial committee of the Privy Council. The case involved the validity of the Ultimate Heir Act of the legislature of Alberta.

The judgment of the Privy Council upholds a ruling of the Supreme Court of Canada that the Ultimate Heir Act of Alberta is invalid. The Act provides that where a person dies without legitimate heirs, certain of the property goes to the University of Alberta.

Receives Large Salary

Chief Harpooner Earned \$39,000 In Nine Months' Whale Hunt

Few occupations tax the nerves of man more than whale hunting, but few occupations pay better. When the whale-hunting fleet recently returned from the Antarctic after a nine-months' cruise, the chief harpooner had earned a "normal" income of \$33,000. In addition to this sum he had a contract granting him \$20 for each whale he killed. During the nine months he killed 300 whales, and his extra income amounted to \$6,000. Hardly one man in a thousand may hope to be a really good harpooner. It is upon his ability that the result of the expedition largely depends, and though his profit may seem high, it is modest compared with the profit he brings to the expedition.

Changes Name Again

Peking Will Be Known As Pelping Meaning "Northern Peace"

The nationalist government political council has decided to change the name of the historic Manchu capital, Peking, to Pelping, meaning "Northern Peace."

The action is considered at Shanghai as an attempt by the Nanking government to destroy Peking's political importance and further that of Nanking, which they insist is now the National capital.

The announcement of the action of the council states "it is hoped Peking will continue as a centre of art and culture, but as a political centre it is dead."

Should Be Popular

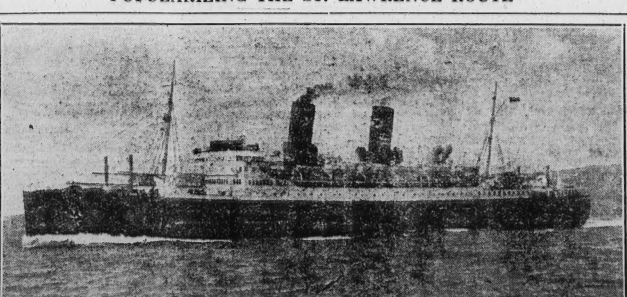

Aerial tea parties every Friday afternoon throughout the summer have been arranged by the Imperial Airways, to enable Londoners and visitors to see the Metropolis from the air. A big 21-seater aeroplane will cruise above London for about 30 or 40 minutes, and tea will be served.

"Now, children, are you telling fairy stories?"

"No. We are discussing the divisibility of the atom and the statistics of bankruptcy!"—Lustige Kolner Zeitung, Cologne.

POPULARIZING THE ST. LAWRENCE ROUTE

The fast maiden voyage of the Canadian Pacific liner "Duchess of Bedford," just put into the service of the St. Lawrence route as the finest of a quartette of 20,000 ton Canadian Pacific steamers has called wide attention to the increased popularity of the St. Lawrence route.

In addition to the "Duchess of Bedford" three other "Duchesses" will shortly be commissioned and this fleet of Cabin Class steamers will constitute the largest ships to call at

Montreal. Their time schedule is so arranged that it is now possible to breakfast in Liverpool on one Friday and in Montreal the following Friday—an unique service for the St. Lawrence.

Excellent appointments and furnished, the "Duchesses" open a new era in Cabin Class travel and experienced travellers who have seen the new liner compare her accommodations very favorably with first class ships. Six hundred feet long, two-tunnel-

ed, oil-burning and 75 feet wide, the new liner has broad deck spaces and many marine innovations, all conducive to passenger comfort. She is commanded by Captain H. Sidras, R.N.R., whose 21 years in the service of the Canadian Pacific Steamships have taken him through the seven seas. He was formerly in command of the "Minnedosa" and "Montreal," having been in charge of the latter vessel on several cruises through the West Indies—a feature to be repeated by the "Duchess of Bedford."

When Food Sours

About two hours after eating many people suffer from sour stomachs. They call it indigestion. It means that the stomach nerves have been overstimulated. There is excess acid. The way to correct it is with an alkali, which neutralizes many times its acid in acid.

The right way is Phillips' Milk of Magnesia—just a tasteless dose in water. It is pleasant, efficient, and

harmless. It has remained the standard with physicians in the 50 years since its invention. It is the quick method. Results come almost instantly. It is the approved method. You will never use another when you know.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

Mrs. Corbett took it out of her hand. "It's a for you, right now," she said; "here's your name on it. It's a separation allowance for fifteen dollars from Arthur Warner, Eagle Mines."

"I do not know anyone called Arthur Warner," said Helmi.

"Well, he knows you, and that's better—anyway, he wants you to have the money, and you're a fool if you don't take it. Read the other one—maybe it will tell."

Helmi opened it and read. It was the letter Jack had opened at Eagle Mines. Helmi read it aloud to Mrs. Corbett. "I know now," she said. "He is a good man, that Mr. English. I will take the money—he means good by me."

"Sure he does," agreed Mrs. Corbett; "he seems like a good fellow, a good Englishman, and there's nothing finer in the world. Now Helmi, dear, I want you to lie down in Rosie's bed and have a good sleep, poor child. Now you'll be having trouble with your breasts, cutting off the baby so suddenly, so I'll run in and borrow Mrs. Kalinski's breast pump—she's the grandest woman that for a neighbor, for she has everything from a boot-jack to curtain stretchers. You see in their business they get all sorts, and he gives her the run of the store—but have your sleep now, honey."

But Helmi's thoughts were not of sleep. She had a duty to perform, and which she had no desire to evade. One great purpose dominated her heart and cried aloud for fulfillment. The money which had come to her made it possible. When Mrs. Corbett came back, Helmi was gone.

CHAPTER XXVII

Dr. St. John lay one evening on the chesterfield in his den, before a cheerful wood fire. Eva was entertaining her Wednesday night "Bridge," and tinkles of laughter, high-pitched and nervous, shot through the velvet murmurs of conversation.

The doctor had listened to such conversation many times, and knew the little razor-sharp points of antagonism it held, and which seemed to pop out like needles from a squeezed pin-cushion, thin, sharp, unexpected, for the temper of the guests was uncertain. They had no community of purpose—they were pursuing no particular trend of thought, they were time killers, sensation hunters. He knew the very odors of the room—saccharine powder, cigarette smoke, flesh of women too scantily clad, perfume heavy and exotic, a sweet smell, yet not wholesome—like good apples wanting air.

The doctor could see it all like a picture. The dark brown background, shot through here and there with little flashes of pale lightning that began in nothing and ended in nothing, led nowhere. Eva's friends met, chattered, parted, met again. No one wiser or better, more inspired to nobler living. They were doing nothing wrong—it was about worse than that, he thought—they were doing nothing.

The doctor recalled that, it was Wednesday night. His mother always went to prayer-meeting on Wednesday night. How Eva would laugh if anyone mentioned prayer-meeting. And yet human nature was the same. But somehow it was getting off the track. His mother had spent years on a treadmill, her days laid out for her in regular lines. Work started at her from morning till night, and she did it, and held her head above it all. She was always sweet-tempered, interesting, sympathetic. Eva having nothing to do, did nothing, and doing nothing, degenerated, grew shallow, selfish, cross-grained and hard.

In his struggling days Dr. St. John had dreamed of having a house like this and a wife who would help him by her sympathy and understanding. But something had spoiled his dream. He had the house and the practice,

and some one to spend his money, but—

In some ways he had been to blame—he had been too easy, indulgent and foolish. Eva and her friends, with which Eva was able to deceive him, furnished many a good story for the lively company which sat the bridge tables.

It was when his mother came to visit him a year ago that the doctor began to see Eva as she was. He had tried to imagine what she would be like when she was as old as his mother, who at sixty-five was as alert and eager-minded as ever, doing many of the things she had wanted to do all her life. To Eva she was a puzzle. How could anyone get such joy from going to the New Year Rally of Sunday School Children? Or why did anyone get up early on Sunday morning to go for a walk? Eva's studied politeness toward his mother irritated him, and it was a relief when his mother went over to Miss Abbie's to finish her visit. So passed another dream. He had so often thought of what a pleasure it would be to have his mother visit him. She was such a good sport, his mother.

Another matter was weighing heavily on the doctor's mind. More surgeons were needed at the front. Why should he stay here at ease? Dr. Brown, his young partner was seriously considering the matter. Dr. Brown had a wife and children—a wife who loved him. Dr. Brown had said that he would go, he being the younger man. That did not matter. Dr. Brown was needed here more than he, who had no one depending on him. Eva would be happier without him so long as the money held out.

These thoughts occupied the doctor's mind as he lay listening to the commotion across the hall. The first year of their married life, when he began to see that Eva had no intention of entering into his life seriously, he was sorely hurt. He had had dreams of domestic happiness since he was sixteen, and it is the loss of a dream that hurts the most. Now he was still hurt, but he was critical. When criticism begins to fill the mind the tenderness of love is over.

(To Be Continued.)

Heart Not Automatic Pump

Simply Controls Flow Of Blood Says German Specialist

The heart is not an automatic pump sending blood to all parts of the body, as generally believed, says Dr. Mendelssohn, a famous heart specialist of Germany. The organ, he says, is simply a governor to control the orderly flow of the blood, this current being due to the constant output and intake of liquid caused by chemical action in the body cells. He further declared recently that the heart, a small muscle the size of a man's fist, "could not possibly be capable of driving the tenuous mass of blood through the entire body."

For Rheumatic Pains.—The pains and aches of Rheumatism and Rheumatism should be treated with Dr. Thomas' Electric Oil. The soothing and healing properties of this famous remedy have been demonstrated for fifty years. Use it also for inflammatory pains, cuts, scratches, bruises and sprains, either in human beings or the lower animals.

Most Sensitive Device

Valuable Information On Blood Circulation Gained Through "Geiger Counter"

The "Geiger Counter" is an exceptionally sensitive device which is able by means of ionization produced to count the electrons which may enter it from any cause. It may be attached to a loudspeaker of conventional type and a loud noise will be heard as each electron enters. A use of it almost as spectacular as the instrument itself has recently been made by Dr. H. C. Blumgart, of the Boston City Hospital. Dr. Blumgart injects an infinitesimal quantity of radio-active material into the arm of a patient, and with this counter traces the time for this material to be carried back to the heart and into the arm. He thus obtains valuable information on blood circulation.

Had New System

Employer: "I trust you are not the kind of workman who drops his tools and runs when the whistle blows."

Applicant: "Oh, no, sir. I always have my tools packed away long before the whistle blows."

An Old Superstition

Two persons who wash their hands in the same water, or who dry their hands on the same towel are likely to get together. Superstition tells you that, but in the north of England, they say to do this signifies a quarrel.

Take Census Of Animals

National Park At Jasper Teaming With Wild Life

A census has been taken of the wild animals in Jasper Park, which constitutes a sanctuary for wild life over 5,000 square miles in extent.

Park wardens have for some years periodically estimated the numbers of the large wild animals in Canada's national parks. Heading the list at Jasper Park, there are, according to approximate estimates, some 15,000 Rocky Mountain sheep, an equal number of mule deer, 5,000 to 6,000 caribou, 3,000 to 5,000 moose, 2,000 to 3,000 Rocky Mountain goats, 15,000 elk and 2,000 to 3,000 black, cinnamon and grizzly bears. For the smaller animals no figures are available, but there are large numbers of beaver, otter, fisher, marten, mink, muskrat and porcupines.

The wild life of Jasper Park is indicative of what may be found in the other great Canadian national parks of the Rockies. Banff, Yoho, Kootenay and Waterton. Together, they measure close to 10,000 square miles, an area of mountain scenery and protected wild life two-thirds as great as all Switzerland, and almost as large as Belgium.

Royal Air Force Band

Will Be Heard At Western Ports During the Summer Months

The band of the Royal Air Force, now on a three months' tour of Canada and an engagement at the Canadian National Exhibition at Toronto, is the youngest among the first-class bodies of military musicians in Britain.

The band, under the leadership of Flight-Lieutenant Amers, will play for a week at the fairs at Brandon, Saskatoon and Regina, Sask., and for two weeks at the exhibition at Toronto, late in August. In the interval, between the western fairs and the opening of the Canadian National exhibition, the organization will give concerts at Victoria and Vancouver, B.C.; Seattle, Wash.; Lethbridge, Alta., and Winnipeg, Man., as well as other cities, and finally will reach Montreal and Quebec.

Miller's Worm Powders act mildly and without injury to the child, and there can be no doubt of their deadly effect upon worms. They have been in successful use for a long time and are recognized as a leading preparation for the purpose. They have proved their power in numerous cases and have given relief to many children, who, but for the good offices of this compound, would have continued weak and enfeebled.

Little things frequently annoy a man—small boarding-house streaks, for instance.

Eczema Formed Painful Blisters Cuticura Healed

"Eczema started with a fine rash on my arms. Later it formed blisters about the size of a bean which were full of water and very painful. It burned and was so sore I could not bear to touch it. The weight of it in my hand would fairly make me cry out with pain. I had my hands and arms tied up from the ends of my fingers to my shoulders. Sometimes I kept me awake for hours."

A friend recommended Cuticura Soap and Ointment so I sent for a free sample. I purchased more, and in about three weeks I was healed." (Signed) Miss Emily B. Davis, R. R. 3, Northwood, Ont.

Keep your skin clear by using Cuticura Soap, Ointment and Talcum for daily toilet purposes. Treat pimples and itching, if any, with Cuticura Ointment, bathe with Cuticura Soap and hot water.

Sample Card Free by Mail. Address: Canadian Import, "Cuticura," 100, Prince, St. Paul, Minn. U. S. Pat. 2,500,000. Cuticura Shaving 25¢, 25¢.

Believe It Or Not

Electric Light Burned Unseen In Scotland For Twenty-Two Years

How a light in an unknown room in a theatre at Glasgow, Scotland, burned unseen for 22 years, has just been reported. When electrical engineers were asked to give quotations on overhauling the lighting system a certain line of conduit disappeared in a wall, and the trail ended. Nearby was a locked door, the key to which had been lost. No one from the manager to the hall boy could remember that the door had ever been opened. It was forced. The unknown room had been used by billposters, and according to a poster lying there the place had not been used since 1906. A 16-candle-power carbon lamp was burning brightly but as it was evidently been left by the last occupant of the room. The report adds that when the manager estimated the cost of the wasted light off 60 watts for 22 years he fainted.

Arresting Decay In Wood

New Treatment Being Used May Make It Imperishable

A new tool has been invented for the purpose of giving logs a "hypodermic injection" to preserve them. This new scientific method is being used to inject into telegraph poles a spreading paste that is said to keep them at bay. Many years are said to be added to the pole's life. This treatment of wood is a step that may lead eventually to complete arrest of decay. If that ideal is accomplished, buildings of wood can be erected that will be as imperishable as structures of stone, brick, or steel, while the cost will be much less. The effect will be that of transmuting wood into rock.

BABY'S OWN TABLETS THE HOME DOCTOR

Baby's Own Tablets meet all the need that exists in every home where there are young children. They are a laxative, but do not grip. They are soothing, but do not contain one particle of opiate or other ingredient that can do any harm to the slightest harm to the most delicate child.

Baby's Own Tablets reduce fever, relieve colic, banish constipation and indigestion, check diarrhoea, soothe the stomach and allay the irritation that accompanies the cutting of teeth. They quiet the nerves and promote health-giving sleep and repose. In fact they are as good as a doctor in any home where a mother has used them for her little ones she will use nothing else. Thousands of mothers testify as to this. Among them are Mrs. Hurst, Pitts, Man., who says: "I was told to try Baby's Own Tablets by a doctor who had used them for all her little ones and said she could not do without them. After using them for my baby I quite agree with her and certainly think they are the finest medicine in the world for little ones."

Baby's Own Tablets are sold by all medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Teeth and Health

Issued By The Canadian Dental Hygiene Council and Published By The Student Dental Society

TOOTHACHE

As a child, you may have thought a tooth sore right through just as a piece of ivory which it resembled. Then one day, you noticed that when something sweet got into the "hole" in a tooth, it hurt a little, but this soon passed away.

So you kept "mum" for fear you would have to go to the dentist. "Until" one night you awakened your parents with crying and announced between sobs that your tooth was "hurting."

Now, what had happened? Within each tooth is a chamber that is filled with soft tissue—blood vessels and nerves, and the decay which is a disease process had been steadily progressing towards the "inside" until the soft tissue had become infected by the disease bearing organisms. Then nature had rushed to the defense to combat them by sending out to the tooth a greater supply of blood, containing millions of little warriors called "Phagocytes." Some of these burst through the "vessel walls" to attack the organisms and a swelling of the tissue causing increased pressure on the nerve endings—which signalled to headquarters that the tooth was in pain.

And, just as in battle, as the fight wages, the wires grow hotter—so the nerves signalled more furiously, crying loudly—until, by and by the fight was over and the wires cooled—and the pain was stilled—and you were so glad that you forgot that you forgot to wonder how it stopped.

Edmonton Canning Factory
Edmonton's newest industry, the Broder canning factory, has started operations with 75 persons on the payroll. This is the first industry of this nature in Alberta.

Little Helps For This Week

"His compassions fail not; they are new every morning"—Lamentations iii. 22, 23.

New every morning is the love. Our waking and uprising. Through sleep and darkness safely brought. Restored to life and power and thought.

New mercies each returning day. Hover around us while we pray: New perils past, new sins forgiven. New thoughts of God, new hopes of heaven.

—John Keble.

Each day, each week, each month, each year, is a new chance given you by God. A new chance, a new leaf, a new life, this is the golden, the unspeakable gift which each new day offers to you.

—Frederic W. Farrar.

Two copies of every act of the British Parliament are printed on vellum. One, endorsed with the royal assent, is kept among the rolls; the other goes to the record office.

Don't Make a Toy Out of Baby—Babies Have Nerves

By RUTH BRITAIN

Much of the nervousness in older children can be traced to the overstimulation during infancy, caused by regarding baby as a sort of animated toy for the amusement of parents, relatives and friends. Baby may be played with but not for more than a quarter of an hour to an hour daily. Beyond that, being handled, tickled, caused to laugh or even weaned, will sometimes result in vomiting, and invariably causes irritability, crying or sleeplessness.

Fretfulness, crying, and sleeplessness from this cause can easily be avoided by treating baby with more consideration, but when you just can't see what is making baby restless or upset, better give him a few drops of pure, harmless Castoria. It's amazing to see how quickly it calms baby's nerves and soothes him to sleep; yet it contains no drugs or opiates. It is purely vegetable—the recipe is on the wrapper. Leading physicians prescribe it for colic, cholera, diarrhoea, constipation, gas on stomach and bowels, feverishness, loss of sleep and all other "upsets" of babyhood. Over 25 million bottles used a year shows its overwhelming popularity.

With each bottle of Castoria, you get a book on Motherhood, worth its weight in gold. Look for Chas. H. Fletcher's signature on it. Because so you'll get genuine Castoria. There are many imitations.

MEDICINE FOR YOUNG GIRLS

Mothers Endorse Lydia E. Pinkham's Vegetable Compound

Sydney, N. S.:—"My seventeen year old daughter took Lydia E. Pinkham's Vegetable Compound for weakness and pains. She could not go about much with the other girls as she was not strong enough. We got six bottles and it did her a great turn. She's working out now in a store and walks three miles every morning and back in the evening."—MRS. MARY VANCE, 44 Lingard Road, Sydney, N. S.

Pinewood, Ont.:—"I constantly had pains in my back and side and spent two days in bed every month. I have taken three boxes of Lydia E. Pinkham's Vegetable Compound Tablets. They have done me good and I always have them in the house. I have recommended your good medicine to several friends and have given it to my 17-year-old girl."—MRS. ALMA OUBLETTE, Pinewood, Ontario.

WHIPPET CARS

If You Have Never Driven a Whippet, Call or Write us for a Demonstration.

We will be pleased to show you the remarkable Speed, Power, Smoothness, Safety and Comfort of this truly modern car that has proved absolutely satisfactory in the hands of the public for over two years.

The wonderful Ease of Control makes it the Ideal Car for the lady driver, and the roomy body is of ample size for five full-grown people.

Mrs. Thompson and Marian returned from Edmonton Thursday.

Mr. and Milton Ross expect to spend the week end at Lloydminster.

Mr. A. H. Lock and family left yesterday to spend a holiday at Banff.

Mr. James Cheaters, of Rivers, arrived Thursday to visit his sister-in-law, Mrs. R. W. Maguire.

Mr. C. C. Riddle and family returned Monday after spending ten days at Carstairs and Calgary.

A shower is being held today at the Orbindale School, for Mrs. L. Prior who has recently been married.

Mr. C. Costin stopped off at Irma for the week end and left Monday to visit his brother Percy at Chicago.

Mr. G. A. Tripp has purchased the S. E. quarter of section 16-16-8-4 from Mr. A. A. Taylor.

The Imperial Lumber Co., have received a new shipment of screen doors in all sizes.

Mr. Harry Sellsted motored to Edmonton last week but had an accident this side of Viking which necessitated him leaving the car and walking home.

Mr. and Mrs. R. M. Campbell and family intend leaving Saturday for a motor trip to Calgary, Banff and Vancouver.

Mr. R. Osterhout left Monday morning for New Westminster, B.C. where we understand he has accepted a position in a garage.

Mrs. C. Haylen formerly located in the Alma Mater district returned from Vancouver Thursday to renew acquaintances in the Irma district.

Mr. and Mrs. S. Johnson attended the wedding of Mrs. Johnson's sister Miss Scoffer, at Jarrow, Wednesday afternoon.

Born at the Royal Alexandra Hospital, Edmonton, to Mr. and Mrs. J. R. Love, Saturday, July 7th, a daughter. Both doing nice.

Mr. W. Cole claims the honor of having the first new potatoes of the season. Mr. Cole dug a nice sample of potatoes last Friday and invited some of his friends to sample them.

Mr. and Mrs. T. Bennon of Hayter have been visiting Mr. and Mrs. Pryce Jones, all of whom left Wednesday for a motor trip to Calgary, Banff and other points.

Mr. R. W. Maguire, manager for the U.G.G. Co., and Derwent, has been spending his vacation with his family at Irma. Miss Lila Maguire is also home on her vacation.

Mr. F. Peterson is making his annual trip through southern Alberta after specimens of grain for the publicity department of the Province of Alberta.

Miss McLean, representing the Dominion Chautauqua secured a committee of some thirty farmers and town people who will assure the Chautauqua programme being put on at Irma this fall. Miss McLean also was successful in securing a committee to bring the programme to Wainwright.

Monday morning Mr. and Mrs. Ross McFarland took their daughter Margery to Edmonton for special examination on account of trouble she was having with her ear. We understand that the specialist has found the trouble was caused from an abscess and tonsil complication which it is expected will not be serious.

Word has been received that Mr. and Mrs. Guy Reed's daughter, Miss Mary Jane Reed, played a piano number over the radio Thursday evening, June 28, from WBBZ Station, Ponca City, Oklahoma. Miss Reed studies under the direction of Mrs. Homer Dodge Caine, of the Caine Conservatory of Music, of Ponca City.

Talk over with one of your classes, what it means to change one's course, Sunday, July 15th at 11 A.M. See Church and Sunday School activities.

Mr. and Mrs. S. Rogers from Edmonton and Mrs. Pridham and Mrs. Johnstone of Toronto were visitors at the Manse during the week. The former Mrs. Wright's parents, the latter, Mrs. Wright's aunts.

Mr. Ted Creed, J. F. Russell and Ed. Peterson, were fortunate last week in catching a black fox, that escaped from Mr. Hornie of Kinsella some three months ago. Mr. Hornie had offered a reward of \$100.00 for the recovery of the fox and has given the men who caught it his cheque for this amount. The fox had wandered about eighteen miles and had made a hole in Mr. Peterson's field a short distance from his barn.

Mr. and Mrs. S. Rogers from Edmonton and Mrs. Pridham and Mrs. Johnstone of Toronto were visitors at the Manse during the week. The former Mrs. Wright's parents, the latter, Mrs. Wright's aunts.

SPECIALS ADDED TO IRMA FAIR

The Irma Branch of the Women's Institute will give a special prize for the best picture of a farm, to be drawn by a school child in grades 5-7 or 8, to be on a drawing pad 9x12 with one inch margin and not colored and not to be copied from any other drawing or picture. The first prize will be \$3.00 and second \$2.00.

A special prize of \$5.00 will be given at Irma Fair by W. Cole for the best pair of chickens hatched from eggs purchased from him. Must be at least three months old at time of exhibition.

Quebec Annual Folk Song and Handicraft Festival

1. Photograph from a painting showing a group of epicureans to be described in the "L'Ordre du Bon Temps" at the Quebec Festival. 2. The Chateau Frontenac, one of the finest hotels in the Dominion, belonging to the chain of the Canadian Pacific Railway.

Announcement of the dates of the second Canadian Folk Song and Handicraft Festival to be held in Quebec this spring, has been made in Montreal by the Canadian Pacific Railway, under whose auspices the event is being promoted. From Thursday, May 24, until Monday, May 28, the ancient city of Quebec will be crowded with music lovers and travellers from all parts who will foregather to witness, take part and compete in the festival, to which famous composers have especially contributed, and in which great Canadian habilitant singer to commemorate whose unique folk music the celebration is being held.

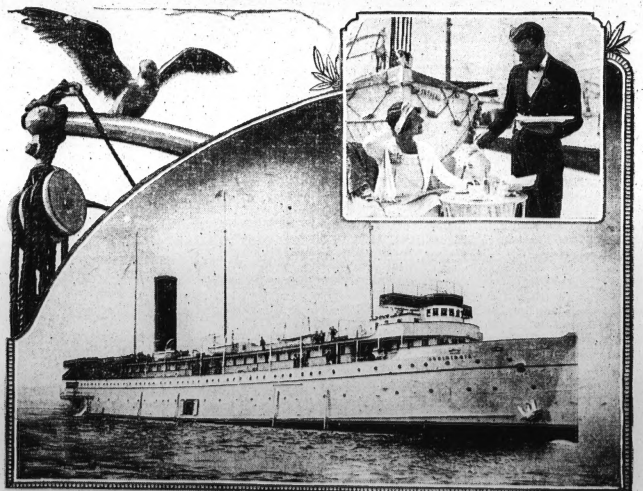

Individuals of international repute associated with the London Conservatory of Music, the Metropolitan Opera of New York, the Paris Opera, the Chicago Grand Opera, the Boston Opera, the Toronto Conservatory of Music, and the Dominion College of Music at Montreal, will be singing in one role or another. Ottawa, Montreal, and Quebec will each contribute singers and musicians to render the attractive, charming, folk-songs and music, typical to the French Canadian habilitant, upon which the whole musical scheme is based. From a musical viewpoint, the feature of the affair will be the production of the thirteenth century troubadour comic opera, "Le Jeu de Robin et Marion," of Adam de la Halle, said to be the first

composition of this nature known in the history of music. This ancient comic opera is, strangely enough, highly relevant to the folk songs and music of the French Canadian habitants of today, as in it are incorporated many of the folk ballads of the thirteenth century. From that period and the succeeding two centuries the French Canadian immigrants drew their music and have preserved it, little altered by the passage of time, unaffected by the developments of that music in the old world.

Of equal attraction will be the specially composed ballad opera, "L'Ordre du Bon Temps," based on a society of good cheer founded by Champlain at Port Royal in 1608. There will be many other musical and dance numbers to be produced in the Auditorium theatre and at the Chateau Frontenac.

The officials of the National Museum, the National Gallery, and Canadian Archives at Ottawa, have combined to assist the festival in every way and have supplied materials to form part of the exhibit of handicrafts and domestic industries depicting the life of the habilitant. These will be elaborated on by a number of skilled crafts-women.

The festival will be of the greatest musical significance and will be contributed to and directed by musicians and connoisseurs of folk songs, and singers of international repute. It will be under the direction of Dr. Marius Barbeau, of the Victoria National Museum at Ottawa, and Mr. Harold Eustace Key, musical director of the Canadian Pacific Railway.

Through Canada's Inland Ocean

1. The Great Lake Steamer S.S. Assiniboia, of the C.P. Fleet which carries its passenger through the land of charm. 2. Serving a little boozel during the trip. 3. The passenger companions and well-wishers of a bon voyage.

The Great Lakes for a summer holiday have no equal. Contrary to the generally prevailing opinion that the automobile and touring and camping are a greater attraction, these large bodies of fresh water, really inland seas, are holding their own, indeed, by those who know it is said that they are doing more.

From Port McNicoll to the Head of the Lakes, is practically an ocean voyage. The great white steamers of the Canadian Pacific Railway are operated the same as the huge ocean liners. At Port McNicoll the visitor sees a man-made harbor, surrounded by a village which has been developed from the original within the last twenty years. About an hour and a half after leaving port a huge sounds the dining call, and going below the traveller finds the dining-room spacious and comfortable which greatly whets the already huge appetite.

After dinner a promenade of the broad white decks, as motionless as the city streets, but with what a difference! The fresh clean breeze stiffens, the sun strikes the horizon and sinks in blazing splendour leaving behind a scene of peace and well-being. Host upon host of graceful white-spread wings appear over the hungry kull. So still they are as to appear motionless, a floating bit of white feather, but a chance opening of the cool's gales port hole brings them swooping down, screaming with the wildness of the blizzard, with a strength and speed that is amazing.

Land slowly disappears, and the islands are lost in the soft enfolding darkness. Stars come out, and a white moon floods the lake with an ethereal beauty. All is quiet—a friendly intimate quiet—broken

here and there by a merry laugh, a passing footstep, the throb of the great engine and the spark on the water. A little later the passing of the protruding Bruce peninsula, then the Manitoulin Island, the home of the Great Spirit, in the distance can be seen the blinking light of the mariners' guides, the light-houses at Cabot's Head, Lonely Island, the Flower Pots and in the further distance at Cape Island, the marking point of the entrance to Lake Huron.

These steamships, the "Keewatin," "Manitoba," and "Assiniboia" of the Canadian Pacific service are first-class in every way, and ply these inland waters from May 21st, to September 28th. The journey occupies the better part of three days, with every wave bringing a further charm and amazement at the unfolding beauty of the trip.
